

Adobe Magento Commerce

Requirements Discovery

Course description: Requirements Discovery is a 1.5 day instructor-led (in a class or virtual) course delivered over 2 sessions. In this course, you will learn effective strategies and best practices for gathering Magento Implementation requirements. Using real-world scenarios gleaned from experience by Magento's Professional Services group, you'll learn how to write user stories and use cases to collect requirements through a Magento-focused lens. You'll also be provided with tools and templates created by the Magento team to document your user stories, use cases, and system diagrams.

Duration: 6 hours

Magento Version: 2.3 (Course applies to all versions of Magento, including Magento 1)

Prerequisites: Managing Your Magento 2 Store or equivalent understanding of Magento features and administration

Target audience: Administrator, Architect, Business Practitioner, Developer, E-commerce Business Analysts

Objectives

After completing this course, you will be able to:

- Understand the basics of gathering requirements for a Magento implementation using a real-world example
- Understand how to streamline the requirements gathering process
- Know how to capture and document user stories and use cases for expected store behavior
- Be able to use tools, templates, and techniques to capture the requirements for Functional, Integration, and Infrastructure areas
- Understand how to validate requirements and hand off for design and development

Course Materials

- Student Guide
- Extensive document templates for student use
